SHRINIDHI D S

Bengaluru, India | +91 7619640838 | shrinidhigowda.02@gmail.com | linkedin.com/in/shrinidhi-d-s-16a66a353 | github.com/Shrinidhi-02

PROFESSIONAL SUMMARY

AI/ML undergraduate currently interning in machine learning at FlyRank AI and in Python development at Infotact Solutions, contributing to an AST-based debugging tool as part of a 5-member team. Builds Python projects end to end, from a Random Forest demand-forecasting model to an autonomous AI coding agent, using Pandas, Scikit-learn, Git, and GitHub. Combines problem solving and teamwork with an interest in explainable, reproducible ML work. Seeking AI/ML, Data Science, or Python Developer internships.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit
- **AI & Automation:** OpenAI API, Prompt Engineering
- **Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Power BI
- **Soft Skills:** Communication, Problem Solving, Teamwork, Adaptability

EXPERIENCE

Machine Learning Intern *Sep 2026 – Present (Ongoing)*

FlyRank AI · Remote | GitHub: github.com/Shrinidhi-02/flyrank-machine-learning

- Developed an explainable rule-based baseline score to prioritize content for review using freshness, CTR, search position, and impressions.
- Built a ranked review queue with reason codes and action labels; documented why top items were chosen and how each could be wrong.
- Evaluated two performance signals using observed decline rates and documented their limitations and potential sources of error.
- Performed feature leakage checks, keeping outcomes separate from scoring inputs, in ML assignments on task framing and data contracts.
- Executed reproducible Python and Pandas notebooks in Jupyter / Google Colab and committed them to GitHub using Git.

Python Development Intern *Sep 2026 – Present (Ongoing)*

Infotact Solutions · Remote

- Engineered an AST-based static analysis engine (Python ast module) as part of a 5-member team building PyChronicle, an AST-powered time-travel debugger, parsing target scripts to identify variable assignment nodes and function/loop boundaries for instrumentation.
- Built a non-destructive AST rewriter that injects state-capturing hooks into target scripts without modifying original source code, enabling the tracer to reconstruct historical execution state.
- Validated the rewriter on sample scripts (loops, conditionals, functions); hardened multi-file, decorator, and comprehension edge cases.
- Collaborated with the Execution Engine lead to define and freeze the hook-interface data contract between the AST rewriter and tracer.

PyChronicle (Team Project) — GitHub: github.com/harshNIU/PyChronicle-AST-Powered-Time-Travel-Debugger *(branch: Shrinidhi-ast-engine)*

RELEVANT PROJECTS

Retail Demand Forecasting System *(Python, Scikit-learn, Pandas, Machine Learning, Random Forest)*

- Built a Random Forest Regression model on 30 days of historical sales data, achieving an RMSE of 2.95 and R^2 of 0.624 through date-based feature engineering.
- Deployed as a serialized model (demand_model.pkl) for on-demand predictions, eliminating retraining overhead.

GitHub: github.com/Shrinidhi-02/Retail-Demand-Forecasting

AI Software Engineer (Mini Devin) *(Python, OpenAI API, Streamlit, SQLite)*

- Built a full-pipeline autonomous AI coding agent (Requirement → Planning → Code Generation → File Creation → Automated Testing → Execution → Result) that converts natural-language requirements into working, tested Python projects via a Streamlit interface powered by the OpenAI API.
- Implemented self-fixing execution with automated unit test generation and a SQLite-backed Project History and Analytics dashboard tracking task status (Completed/Failed) with visual charts.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning *Expected 2027*

Akash Group of Institutions, Bengaluru — CGPA: 7.1/10

Class 12 (PCMB) — Pre-University Course *2023*

SDM PU College, Ujire — 383/600 (First Class)

CERTIFICATIONS & LEARNING

- AI & Machine Learning: Oracle Certified Foundations Associate (AI Foundations & Agentic AI)
- Additional Learning: IBM SkillsBuild AI Fundamentals • Udemy Machine Learning & AI Beginners Course
- Programming & Data: HackerRank Python (Basic) Certification • Oracle SQL Explorer • Power BI Workshop - OfficeMaster

LANGUAGES

English, Hindi, Kannada
